QUITO - ECUADOR
BRIDGING CULTURES
ACTIVITIES

• Complementary work on the Carpentry workshop.

• Fixing the home of María Sita Narváez.

• Interior painting of church.
Technical Data:

a) 60 m² of construction.

b) Construction:

- Pouring the cement foundation.
- Laying the block walls 15x20x40 cm.
- Putting together the metallic structure (columns, beams and support).
- Placing the aluminum roof.
- Placing the metallic protection, the access door.
- Installation of the electrical system and potable water.
IDEA
The students of the Educational Unit and the residents of Pusir Grande will learn to repair or fabricate their own windows, doors and metallic protections.

PURPOSE
To provide more labor opportunities for the young people who graduate from the Educational Unit.
With the implementation of this idea, the young people no longer have to depend on just their academic knowledge, but they have the option of technical jobs.
LAYING THE FLOOR
Work at the house of María Sita Narváez
PROBLEMS

1. The roof was in bad shape. The beams were broken and full of termites, some of the roofing material was broken.
2. Lack of ventilation and illumination inside the house. The walls of the house have no windows.
SOLUTIONS

1. Substitution of 100% of the wooden beams
2. Replacement of the broken roofing panals.
3. Opening three windows in the walls.
PAINTING THE INTERIOR OF THE CHURCH
THE PROBLEM

DIRTY WALLS, WITH FISSIONS, AND STUCCO WHICH HAD FALLEN OFF.

SOLUTION

• CORRECTION OF THE FISSIONS AND FAULTS IN THE STUCCO.

• APPLICATION OF PAINT ON THE INTERIOR WALLS OF THE CHURCH.
